

medtech CLOUD™

Secure, flexible and cost effective

In a Cloud solution, applications and data are stored, run from and managed by a central Cloud server.

Users do not download and install applications on their own device or computer. Instead, data and applications are delivered to your device via a secure, high speed internet connection, utilising the processing power and storage space of the Cloud server.

A Cloud model removes the need for version upgrades or license management on individual computing devices.

Medtech Cloud™ is a secure hosted desktop solution giving you the flexibility to easily increase IT capacity or add capabilities without investing in new infrastructure.

Medtech Cloud™ Features

24/7 Availability

Be assured, Medtech Cloud™ will be available 24/7. Practices will be notified of any scheduled maintenance.

Reduced IT Costs

Avoid capital expenditure on infrastructure, software and service upgrades, and ongoing maintenance costs.

Fixed Costs

Our fixed cost delivery model means you will know exactly how much you'll be paying each month.

Expert Support

A dedicated Medtech Cloud™ support team and comprehensive online Help resources are available to help you quickly deal with any queries.

Data Security

Data is securely stored in a state of the art data centre with 24-hour security monitoring.

Daily Backups

Daily data backups ensure your data will never be compromised and always on hand should you need to access it.

Windows & Mac

Medtech products can be run on both Windows and Mac operating systems.

Disaster Recovery

Medtech Cloud™ systems are replicated onto an offsite platform that can be activated when required.

Tailored Cloud Solutions

Cloud solutions can be adapted to suit your needs. Extra capabilities and storage can be easily added to your Cloud solution at any time.

Additional Cloud Services

Additional services like network services, emails and hosting of other applications can be easily added.

Compatibility

All Medtech applications including Medtech32™, Evolution General Practice, Evolution Specialist and Evolution Allied Health can
